

Sprint 4 Report
Author: Yongsheng Cui

Product Name: LeapCal.

Team Name: CAP.

Revision Number: 1.0

Revision Date: December 1st, 2019.

Actions to stop doing:

CAP feels that we need to communicate more about how we work. It can throw off a lot of the workload when this happens and unnecessary work.

Actions to start doing:

CAP feels that we need to be more communicative, especially about our work quantities. We have our Jira board to view the tasks, and discord to talk with others. But meet in person and talk face to face is more understandable before move to the next step.

Actions to keep doing:

We work well with others. Keep more communication, and share what we have done and how it helps the project. More importantly, we can learn from each other by sharing our knowledge according to work on the project.

Work Completed/ Not Completed:

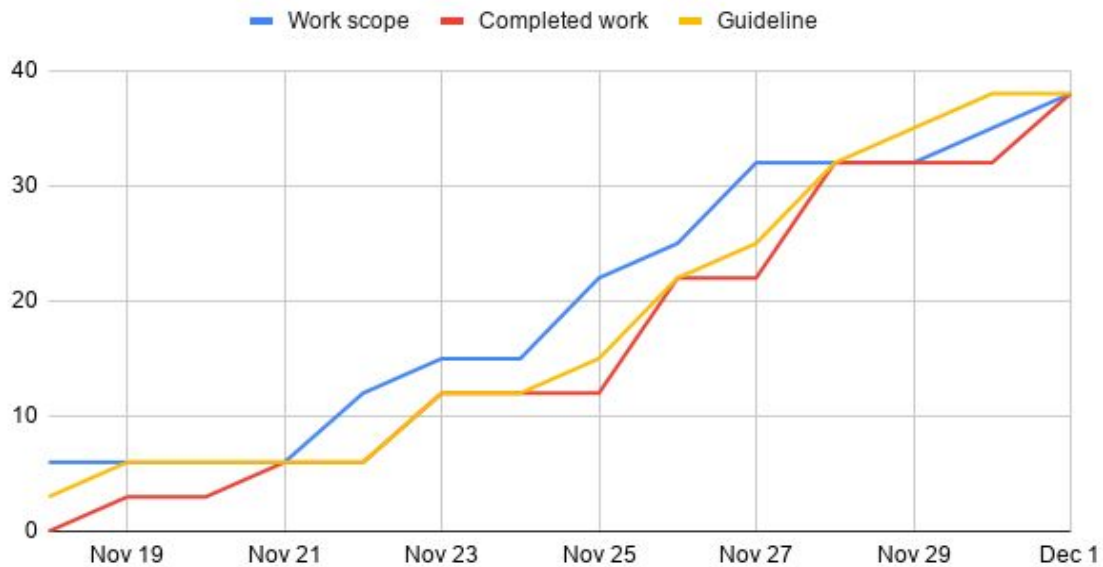

All of the initial sprint plan was completed, we reach our MVP as well. All tasks whose planning poker point is 38 points, we finished all the work perfectly. The Front End and Back End work together perfectly. We had nothing that is not completed. Any additional feature is optional.

Work Completion Rate:

100% of Must Do User Stories. 5/5

100% of Should Do User Stories: 1/1

Sprint 4 Burnup Chart

Assigned story points for tasks for every team members:

Alexander Bistagne: 8 Story points 10 hours
Matthew Johnson: 9 Story points 20 hours
Yongsheng Cui: 5 Story points 13 hours
Weihao Ke: 5 Story points 16 hours
Alfredo Vicuna: 11 Story points 28 hours
