<div align="center"><u>Guidelines</u></div>

As a developer of CAP, I will adhere to the following development guidelines:

- I will participate in our group activities, expressing my thoughts on any issues and/or ideas on matters.
- I will consider a task done when we have the following criteria met :
  - I have created unit tests for the code.
  - The code can pass the continuous integration set up.
  - I have created a pull request.
  - I have had a teammate review my code and taken into consideration the proposed amendments.
- I will use the same naming conventions throughout the code.
